

AI & Machine Learning

8-10 weeks · Band A · 155 hours · Live cohort of 20

Already the most defense-heavy funnel in industry. The final rounds are largely somebody asking why you did it that way, and then asking again.

PILOT COHORT PRICE

~~₹14,999~~

₹9,999

SAVE ₹5,000

Pilot pricing, for the first 20 seats.

WITH PAT-VERIFIED

~~₹18,999~~

₹12,999

SAVE ₹6,000

Base plus the ₹3,000 credential add-on.

TO HOLD A SEAT

₹500

Refundable for 7 days, credited toward the base price on enrolment.

The hiring funnel this mirrors

Screening on fundamentals, then an applied take-home on a messy dataset, then a discussion of an existing project, then a deep technical conversation about approach and failure.

The take-home is real here — unlike full stack, this funnel genuinely runs multi-day applied tasks rather than timed machine coding.

The four-project spine

Each project corresponds to one stage of that funnel. Finishing the stream is rehearsal for being hired.

01	Solo 1 THE SCREENING TASK	A clean dataset and a specified metric. Build and evaluate a baseline. Reproducibility is graded: same seed, same numbers.	20h
02	Solo 2 THE TAKE-HOME	A dirty dataset with leakage planted in it and no stated metric. Choose the metric, justify it, find the leak. Finding the leak is most of the grade.	35h
03	Pair THE TEAM ROUND	One student owns retrieval, the other generation and evaluation, on a shared service. They agree an interface and an eval set before either writes code.	40h
04	Capstone THE FINAL LOOP	Student-proposed applied ML system with a real evaluation story — what it gets wrong, measured.	60h

Hours are indicative student effort and include the 30-hour DSA layer woven into the projects.

The DSA layer – full, about 30 hours

Arrays, strings and hashing during Solo 1. Sorting, two pointers and recursion during Solo 2. Trees, graphs and traversal during Pair. Complexity analysis of the student's own capstone code at the end. The final third adds timed rehearsals in both formats this funnel uses – algorithmic rounds and the 90-minute machine coding round.

A problem is only set when a project touches the structure, never as homework divorced from context. How much this stream carries is decided by what its funnel actually asks for. That load sets the stream's depth, and the depth is what places it in Band A.

How the PAT is marked

Seven dimensions, 100 marks. Weighting is set per stream.

Problem framing	18
Design trade-offs	20
Implementation quality	12
Programming fundamentals	12
Failure analysis	20
Collaboration evidence	8
Defense under questioning	10
Total	100

60 is the pass mark, with no single dimension scoring zero. The same mark applies to every stream.

What the assessor will ask

The defense probes two things at once: the decisions you made, and the programming knowledge underneath them.

- Why this metric, and what it hides
- What the baseline was, and why it is honest
- Where the model fails and who it fails for
- Implementation questions from their own pipeline code
- What breaks first at ten times the data

Questions come from your own project, so there is no question bank to practise against. Saying “I don't know” cleanly scores better than a confident wrong answer.

Before you start

Python. Basic statistics. Linear algebra literacy, not fluency.

How the defense runs

Submit the repository and a short written rationale 48 hours ahead. Walk the assessor through the system, then answer questions. Assessors probe decisions and fundamentals, not syntax recall. Scores and written notes are returned afterwards, and a defense can be retaken once.

What you pay

Foundation ~~₹14,999~~ ₹9,999

Live mentor-led teaching and the four projects.

PAT-Verified Credential ~~+₹4,000~~ +₹3,000

Live defense, mentor recommendation letter, verified portfolio published to a recruiter-visible profile, credential badge.

Career Hub Free

Recruiter visibility and job matching. The employer pays, never the student.

Bundled stack ~~₹18,999~~ ₹12,999

Everything above, at pilot pricing.

Apply now – pay ₹500 to hold your seat

20 SEATS · COHORT STARTS SOON · PILOT PRICING ENDS SOON

Deposit refundable within 7 days and credited toward the base price on enrolment.
